And more...

Synology Disk Station DS209 is designed to provide users with a flexible solution to share files and increase productivity. Packed with the Synology Disk Station Manager 2.2, it delivers ease of use and variety of features. Furthermore, the optional Synology 2.5" Disk Holder provides an easy way for users to deploy 2.5" hard drives on the DS209, bringing the library quietness, power saving, and higher reliability for the DS209.

Effortless File Sharing & Backup

Synology Disk Station is designed for data storage and sharing among Windows, Mac, and Linux. Seamless file sharing across different operation systems is an effortless process.

Synology File Station 2 offers an innovative user interface with drag-n-drop and right-click capability allowing users not familiar with FTP to easily access files with a web browser.

Synology Data Replicator 3 allows Windows users to back up desktop data to the Synology Disk Station. Immediate, Sync, and Scheduled Backup are fully-supported.

Synology Local Backup helps to safeguard data by backing up to external hard drives via USB interface with flexible scheduling options.

Office Applications

Synology Mail Station add-on provides a one step installation and enables Synology Disk Station to be a mail server that supports Outlook-like Web mail, SMTP, POP3, and IMAP.

Synology Web Station with Virtual Host option allows users to host up to 30 websites on one single Synology Disk Station. The built-in PHP+MySQL provides the ability to create interactive websites without complicated settings.

Synology Disk Station supports two USB printers simultaneously, and the Add Printer Wizard simplifies setup process with a wizard.

3rd-Party Application Integration

Following "Synology NAS Server 3rd-Party Apps Integration Guide" on Synology website, users can customize their Synology Disk Station by installing their favorite applications.

Eco Friendly

Synology Disk Station is designed and developed perpetually with the concept of energy saving. Compared with average PC counterparts, Synology Disk Station consumes a relatively low amount of power and hibernates when not in use. This not only helps to save energy but also extends the lifespan of the hard disk.

Synology Disk Station truly earns the title of "green product" because of the unique Scheduled Power On/Off feature, and the smart fan design effectively cools down the system with minimum power consumption, yet keeps the system quiet on operation.

Finally, all Synology products are produced with RoHS compliant parts and packed with recyclable packing materials. Synology recognizes its responsibility as a global citizen and is continually working to reduce the environmental impact of the products we create.
